

Announcement- Update Reminder for MATRICE 200 Series Drones and Batteries

Dear Valued Customers,

Flight safety and product reliability are top priorities for DJI. When prompted on the DJI Pilot App, we recommend all customers to connect to the internet on the App or DJI Assistant 2 and update your product's firmware to ensure a safe flight with their drone.

1. How to update the firmware:

https://www.djivideos.com/video_play/063a0ab4-e89f-40a1-a392-abc872232461?autoplay=1&poster=https://cdn-usa.skypixel.com/uploads/usa_files/video/image/6882abb7-522c-4183-834b-7263dccc3c99.jpg@!1200

2. How to update the TB50/TB55 battery Via DJI Assistant 2

- a. Install batteries into aircraft, then connect aircraft to your PC.
- b. Start DJI Assistant 2
- c. Update aircraft firmware to the latest version
- d. If current version is show V xx.xx.xxxx “—”, it indicates that some module are not the latest version.
- e. **IMPORTANT:** If you have more than one pairs of batteries, please swap and repeat this process to update each pair of the batteries separately.

THE FUTURE OF POSSIBLE

B. Via DJI GO 4 or DJI Pilot (V0.6.3)

- Please check your aircraft firmware version and ensure it is the latest version
- If your aircraft firmware version is not above-mentioned versions, please use DJI Assistant 2 for updating.
- Install batteries to aircraft, then power on the aircraft.
- The aircraft will check its firmware version automatically. When it informs that the aircraft and battery firmware versions are inconsistent, just slide the bar to update firmware.

- If you have more than one pairs of batteries, please swap and repeat this process to update each pair of the batteries separately.

3. How to check the firmware version :

- Use DJI Pilot app

b. Go to Setting→Common setting→About

c. Check the firmware

THE FUTURE OF POSSIBLE

4. The latest firmware version list:
